Harvard University: An Introduction

General Information: Harvard was founded in 1636 by vote of the Great and General Court of the Massachusetts Bay Colony and named for its first donor, the Reverend John Harvard, who left his personal library and half his estate to the new institution. Harvard University is the oldest institution of higher learning in the United States. The University as a whole has grown from nine students with a single masters' degree to an enrollment of more than 18,000 degree candidates, including undergraduates and students in 10 principal academic units. An additional 13,000 students are enrolled in one or more courses in the Harvard Extension School. Over 14,000 people work at Harvard, including more than 2,000 faculty. There are also 7,000 faculty appointments in affiliated teaching hospitals.

There is no single office at Harvard University that handles admissions for all students to all programs. Instead, each school maintains its own admissions office and specialized staff to meet the needs of prospective students. The information on the pages that follow is intended to provide a general overview of the University's offerings.

Undergraduate Program: Harvard College

General Information: Since its founding in 1636, Harvard College has assembled promising students and distinguished faculty and provided them with an environment and resources to develop their talents to the fullest. Students come from all 50 states and from over 95 countries around the world; from cities, suburbs, small towns and farms; from public, private and parochial schools; from every ethnic and religious background; and from across the economic spectrum. Based on longstanding tradition and backed by generous financial policies, Harvard is committed to making its educational opportunities accessible to all, regardless of citizenship.

Harvard offers its students everything necessary for a liberal education in more than forty fields of study. Undergraduates choose from nearly 3500 courses in pursuing either a bachelor of arts (AB) or a bachelor of science (SB). Students learn in classrooms and laboratories from professors who are leading authorities in their fields. All members of Harvard's world-renowned Faculty of Arts and Sciences teach undergraduate students.

Just as important, Harvard offers its undergraduates the privilege of living and studying with exceptionally talented and motivated peers from all over the globe.

Much of the value of a Harvard education lies in things learned outside the classroom and in the relationships established with others in the community, especially with fellow students. To this end, Harvard provides an intimate residential system, and nearly all students choose to live on campus during their four years as undergraduates. Harvard also offers extensive extracurricular opportunities with over 400 official student organizations including performing and visual arts groups, student government, public service organizations, ethnic and cultural groups, publications, and 42 varsity athletic teams.

Graduate and Professional Schools:

Harvard Graduate School of Arts and Sciences

General Information: The Graduate School of Arts and Sciences (GSAS) at Harvard University is a community of discovery, a place to explore ideas, embrace complexity, and create new understandings. Harvard has a proud tradition of convening the world's most promising and dedicated scholars, representing diverse backgrounds from all over the world. GSAS welcomes students from a breadth of academic fields with varied experiences and upbringings, and a history of accomplishments that marks the potential for scholarly achievement to enrich the academic environment for all.

GSAS offers the master of arts (AM), master of science (SM), master of engineering (ME), and the doctor of philosophy (PhD) in 56 programs across multiple areas of study, including 17 interfaculty programs and 3 combined degree opportunities that partner with Harvard's world-renowned professional schools.

GSAS believes that fostering an environment of inclusivity and accessibility is essential to the successful pursuit of scholarship at the highest level. Diversity is a source of strength at Harvard, and we welcome all scholars, regardless of their race, ethnicity, gender identity, physical ability, nationality, sexual orientation, or religion. Our students come from all over the globe and from varied backgrounds and lifestyles, creating a rich tapestry of outlooks, beliefs, and perspectives.

Our alumni engage in a variety of careers, both academic and nonacademic, holding leading positions in the front ranks of research and teaching, policy and administration, across the US and throughout the world.

Harvard Business School

General Information: Founded in 1908, Harvard Business School is nearly as old as the concept of management education itself-and in just a little more than a century, the School has produced leaders and ideas that have shaped the practice of management in vital organizations of every kind around the globe.

At HBS, we see our history as a challenge-a legacy of energy and innovation we strive to equal every day. From our faculty to our alumni, the greater HBS community is continuing to redefine the nature of management education and to invent the future of business.

Degree programs include a Master of Business Administration (MBA) and eight Doctoral programs (DBA and joint PhD).

HBS MBA offers a deferred admission process for current college seniors. More information on the deferred admissions process can be found at:

www.hbs.edu/2+2. Information on the regular admissions process can be found at: www.hbs.edu/mba/admissions/.

HBS offers DBA programs in Accounting and Management, Management, Marketing, Strategy, and Technology and Operations Management. In collaboration with Harvard Graduate School of Arts and Sciences, and PhD programs in: Business Economics; Organizational Behavior; and Health Policy (Management).

Key aspects underlying the School's success include:

- The Case Method • A Vital Residential Community • Pioneering Research
- Exceptional Resources • Closeness to Practice • Our Alumni
- International Scope

Harvard School of Dental Medicine

General Information: Founded in 1867, the Harvard School of Dental Medicine (HSDM) was the first university-based US dental school, and the first to develop a close affiliation with a medical school (Harvard Medical School). HSDM offers candidates an unparalleled opportunity to draw on the resources of a world-renowned University and medical center in the education of its dental students. At its heart, the program considers dentistry a specialty of medicine with a curriculum that fully integrates oral and systemic health to achieve patient-centered comprehensive care.

Students in the Doctor of Dental Medicine (DMD) degree program study basic sciences with their Medical School classmates at Harvard Medical School their first year gaining an appreciation of the human mind, body, and spirit. Students have the opportunity to make an early connection between their medical courses and their future profession with clinical rotations at major affiliated hospitals in the Boston area such as Massachusetts General Hospital and Boston Children's Hospital. The opportunity to learn firsthand the importance of the doctor-patient relationship, and participation in research, results in a deep understanding of the synergy of oral health and general health. A pass/fail grading system encourages a high level of collaboration and support, and the small class size of 35 students, the smallest in the country, encourages a highly interactive small-group learning environment with faculty members who serve as teachers, advocates and mentors. Students are engaged in a team-based, case-based learning format that fosters critical thinking and the development of lifelong learning skills important to health care providers.

The exploration of research at Harvard permits students to participate in a world-class environment that sets the standard for basic discoveries, clinical application, and research training in dental medicine. Advanced Graduate Education (AGE) programs at Harvard School of Dental Medicine lead to a Master of Medical Science (MMSc) or Doctor of Medical Science (DMSc) with a certificate in a specialty: Dental Public Health, Endodontics, Oral Medicine, Oral and Maxillofacial Pathology, Orthodontics, Periodontology, Prosthodontics, Dental Education (MMSc only), and the joint HSDM/Forsyth Institute Research Academy (DMSc only). HSDM also offers certificates in General Practice Residency at Mass General Hospital and Cambridge Health Alliance, Pediatric Dentistry, Implant Dentistry, Geriatric Dentistry, and Dental Public Health.

HSDM offers the following degrees and/or certificates:

- MMSc • DMD • Joint DMD/PhD in biological sciences
- DMSc • AGE certificates

Harvard Graduate School of Design

General Information: The Graduate School of Design (Harvard GSD) is dedicated to the education and development of future leaders in the professions of architecture, landscape architecture, urban planning, and urban design. We offer master's and doctoral degrees, as well as Design Discovery (summer) and Executive Education programs. With an international faculty and student body, the Harvard GSD provides a broad range of design philosophies and visions. The expansive resources of the GSD and those of Harvard University are available to all GSD students.

The Master in Design Studies (MDes) degree seeks to empower the next generation of innovators and designers through a set of novel and alternative methodologies in a collaborative environment. This non-studio program includes areas of concentration in art, conservation, energy, philosophy, real estate, resilience, technology, and urbanism. The Harvard GSD and John A. Paulson School of Engineering and Applied Sciences (SEAS) offer a collaborative Master in Design Engineering (MDE) degree. The program offers students the skills and knowledge to take a collaborative, innovative approach to technically deep, complex, multi-scale, and open-ended problems.

Professional studio-based master's degree programs are offered in Architecture (MARCH I), Landscape Architecture (MLA I), and Urban Planning (MUP). These programs are open to students with both design and non-design academic backgrounds.

Post-professional studio-based master's degree programs are offered in Architecture (MARCH II), Landscape Architecture (MLA II), and Urban Design (MAUD/MLAUD). A professional degree in either Architecture or Landscape Architecture is a prerequisite for these programs.

The Harvard GSD offers two doctoral degree programs, the Doctor of Design (DDes), and the Doctor of Philosophy (PhD) in Architecture, Landscape Architecture, and Urban Planning. The PhD program is administered through the Graduate School of Arts and Sciences.

Harvard Divinity School

General Information: The most religiously diverse divinity school in the United States, HDS's student body and faculty includes more than 30 different faiths and denominations. The School is a model for the kind of informed pluralism that will be ever more critical for the United States and the wider world in the decades to come.

The HDS faculty includes some of the world's top scholars of Christianity, Buddhism, Hinduism, Islam, Judaism, and many other traditions. And the School's doctoral program is one of the main sources of faculty for religious studies departments at top institutions throughout the country. At the same time, the preparation of religious leaders is also central to this endeavor—as it has been at HDS for 200 years, and at Harvard for nearly four centuries.

Because religion is deeply intertwined with virtually every area of knowledge, its study at HDS is inherently interdisciplinary. The Master of Theological Studies program, for instance, includes 18 different areas of focus, and enables exploration of a variety of religious traditions, and allows for studies in politics and ethics, social science, and literature and culture, to name just a few.

The curriculum assures that students have sufficient latitude in shaping their individual courses of study within a basic framework deemed essential to the preparation of leaders in ministry, religious studies, and a wide range of professional fields. Students are encouraged to draw on the impressive range of resources not only of the Divinity School, but also of other schools within Harvard University and member institutions of the Boston Theological Institute.

The study of theology and religion at Harvard Divinity School thus enables its graduates to pursue diverse vocations in ordained and lay ministry, in scholarship and education, and in the human services, journalism, medicine, law, government, and numerous other professions. Degree programs offered are the master of divinity (MDiv), master of theological studies (MTS), master of theology (ThM), and doctorate of philosophy (PhD) which is offered jointly with the Graduate School of Arts and Sciences, and is administered by the Committee on the Study of Religion.

Harvard Graduate School of Education

General Information: Founded in 1920, the Harvard Graduate School of Education (HGSE) is dedicated to changing the world — improving lives and expanding opportunities through the comprehensive study and effective practice of education. Through research and master’s degree, doctoral degree, and professional education programs, HGSE cultivates leaders and innovators, explores the most important questions in education, and shares exciting ideas and best practices with the world.

At the master’s degree (Ed.M.) level, 13 intensive yearlong programs span the entire spectrum of education, from international education policy to cognitive development to education technology. The Doctor of Education Leadership (Ed.L.D.), taught by faculty from HGSE, the Harvard Business School and the Harvard Kennedy School, is the only program of its kind, preparing system-level leaders to transform American education. The interdisciplinary Doctor of Philosophy in Education (Ph.D.), offered jointly with the Graduate School of Arts and Sciences, trains cutting-edge researchers who will drive policy and practice. At every level, HGSE students learn from faculty who are leaders in research, policy, and practice; enjoy opportunities to work across the university and in the field; and prepare to take on leadership roles. Graduates go on to work not only as teachers and principals, but also as entrepreneurs, district and organizational leaders, researchers, policy analysts, school counselors, technology experts, and advocates, from pre-K through higher education.

Harvard John A. Paulson School of Engineering and Applied Sciences

General Information: Through teaching and collaborative research, the Harvard John A. Paulson School of Engineering and Applied Sciences (SEAS) discovers, designs and creates novel technologies and approaches to societal challenges—in service to the world, the nation, and our community. We bridge disciplines, both within engineering and the applied sciences and beyond, to prepare broadly trained leaders, to advance foundational science, and to achieve translational impact. A diverse community of more than 2,300 students, faculty, researchers, and staff, SEAS traces its origins to the Lawrence Scientific School, founded in 1847. Today, SEAS serves as the connector and integrator of Harvard’s teaching and research in engineering, applied sciences, and technology. Our core tenets—educating broad-minded students; interdisciplinary research; and balancing theory, experimentation, and practice—create an unmatched environment for learning and exploration.

Undergraduates at SEAS are enrolled in six concentrations (majors): Applied Mathematics, Biomedical Engineering, Computer Science, Electrical Engineering, Engineering Sciences (including the Environmental Science and Engineering track), and Mechanical Engineering. SEAS students represent approximately 20 percent of all Harvard College concentrators.

Our doctoral and master’s degree programs lie at the interfaces of engineering, the applied sciences (from biology to physics), and technology. Rather than traditional academic departments, we are organized into broad areas. Doctoral programs include Applied Mathematics, Applied Physics, Computer Science, and Engineering Sciences (with tracks in Bioengineering, Electrical Engineering, Environmental Science and Engineering, and Materials Science and Mechanical Engineering). Masters programs include Computational Science and Engineering, Electrical Engineering, Design Engineering (collaboratively offered with the Graduate School of Design), Data Science (collaboratively offered with the Statistics Department), and an MS/MBA (jointly offered with Harvard Business School).

Harvard Kennedy School

Ask What You Can Do

General Information: The mission of Harvard Kennedy School is to train enlightened public leaders and generate the ideas that provide solutions to our most challenging public problems.

Harvard Kennedy School brings together a unique and diverse group of individuals from across continents and sectors who are committed to the public interest. Scholars and practitioners, public officials and social entrepreneurs, educators and students, teach and learn from one another in a vibrant atmosphere of intense inquiry and open dialogue. The unique learning environment at HKS provides a stimulating setting in which to develop highly skilled public leaders and discover innovative solutions that can influence societies and improve lives.

Four master's degree programs are offered at Harvard Kennedy School:

- Master in Public Policy (MPP)
- Master in Public Administration in International Development (MPA/ID)
- Master in Public Administration (MPA)
- The one-year Mid-Career Master in Public Administration (MC/MPA); students from developing, newly industrialized, and transitional economy countries enroll in the Edward S. Mason Program

MPP, MPA/ID, and MPA students have the opportunity to earn a second joint or concurrent graduate degree in a shorter amount of time from a professional school either at Harvard or a partner academic institution. Doctoral Programs are also offered through HKS that focus on political economy and government, public policy, social policy, and health policy. More than 30 Executive Education programs – most one week or less – are held throughout the year at HKS.

The Harvard Kennedy School student community represents nearly 100 countries, making it one of the most international schools at Harvard. The student experience is just as rich outside the classroom as it is inside, preparing students for significant leadership positions in public service. Students are actively involved in the Kennedy School Student Government; student-organized conferences; student-run publications; well over 60 student clubs, caucuses, organizations, and professional interest councils; and events organized by the 11 on-campus research and policy centers and programs.

Harvard Law School

General Information: The world's premier center for legal education and research, Harvard Law School provides unparalleled opportunities to study law and related disciplines in an energetic and creative learning environment.

A Harvard Law education prepares students for success in law practice, business, public service, and academia. Through its faculty, students, and alumni, Harvard Law School contributes solutions to the world's most complex legal and social challenges.

Our students come from all over the United States and more than 70 countries around the world. Harvard offers three degrees in law: Candidates without an undergraduate degree in law typically pursue a J.D. (Juris Doctor) degree, while candidates who have at least a first law degree (J.D., LL.B., abogado, or the equivalent) are eligible to pursue an LL.M. (Master of Laws) degree. The S.J.D. (Doctor of Juridical Science) degree, the equivalent of a Ph.D. in law, is designed for advanced students interested in producing significant legal scholarship.

Students at Harvard Law School select from over 550 courses, seminars and reading groups offered each year. In addition, clinical placements are available in more than 30 areas of law. Outside of the classroom, Harvard Law School offers more than 100 student organizations, including student practice organizations, professional interest groups, social groups, ethnic and affinity organizations, and student journals, which allow students to engage with their classmates who share their interests. HLS also offers its students access to unmatched resources for legal research. For example, Harvard is home to the world's largest academic law library. Its collections, numbering nearly two million volumes, support the teaching and research activities of the School and serve as a resource for legal scholars throughout the world. Harvard's international collections contain materials from more than 230 jurisdictions.

Harvard Law School's outstanding faculty and extraordinarily gifted students and alumni, its prodigious resources, and its location at the heart of Harvard University all contribute to its leadership role in American and international legal education.

Harvard Medical School

General Information: The mission of Harvard Medical School is to create and nurture a diverse community of the best people committed to leadership in ending human suffering caused by disease. A leader in medical education since its inception in 1782, the Harvard Medical School has grown to become the center of one of the nation's premier locations for medical training, research and practice. Located in the heart of the Longwood Medical Area of Boston, the School has seven basic science and three social science departments, and is affiliated with 17 hospitals and institutions. The Medical School has over 12,000 affiliated faculty, including more than 175 tenured and tenure-track faculty on the campus in nine preclinical departments. The Medical School has two distinct curricula that lead to a doctorate in medicine (M.D.) degree.

The Pathways curriculum incorporates pedagogical approaches that foster active learning and critical thinking, using case-based team sessions, supplemented by lectures and labs. The Pathways program offers early clinical placement, and advanced clinical and student-tailored basic/population science experiences that will provide customized pathways for every student. Pathways admits 135 students each year.

The Health Sciences and Technology (HST) M.D. Curriculum is a joint program that brings together the extensive resources of both Harvard and the Massachusetts Institute of Technology (MIT) to prepare students for interdisciplinary research careers in academic medicine. HST offers a rigorous and quantitative curriculum, where students focus on biological, chemical, physical, and engineering sciences and collaborate with Harvard and MIT faculty on substantive, groundbreaking research. HST admits 30 students each year.

Harvard supports combined degree programs with Harvard's other graduate schools, including M.D.-M.B.A., M.D.-M.P.P., M.D.-M.P.H., and M.D.-Ph.D.. The Harvard/MIT MD-PhD Program is supported in part by the NIH Medical Scientist Training Program (MSTP) and includes Ph.D. programs at Harvard and MIT in both the basic and social sciences.

Harvard T.H. Chan School of Public Health

Powerful ideas for a healthier world

General Information: The Harvard T.H. Chan School of Public Health grew out of the Harvard-MIT School for Health Officers, the nation's first graduate training program in public health. The School aims to deliver an evidence-based educational experience to prepare students, through study, research, and practice, to address public health challenges of the twenty-first century. Furthermore, the School works to create and sustain a vibrant and inclusive intellectual community with an environment that fosters the acquisition of knowledge and skills about diversity, equity, cultural competence, and advocacy to improve public health locally, nationally, and globally.

The field of public health is inherently multi-disciplinary. So, too, are the interests and expertise of the School's faculty and students, which extend across the biological, quantitative, and social sciences. We are able to confront the most pressing diseases of our time—AIDS, cancer, and heart disease—by adding to our knowledge of their underlying structure and function. Core quantitative disciplines like epidemiology and biostatistics are fundamental to analyzing the broad impact of health problems, allowing us to look beyond individuals to entire populations. And, because preventing disease is at the heart of public health, we also pursue the social sciences to better understand health-related behaviors and their societal influences—critical elements in educating and empowering people to make healthier lifestyle choices.

Harvard Chan School is organized into nine academic departments, which form the loci of most teaching and research activity. Degrees offered by Harvard Chan School are doctor of public health (DrPH), master of public health (MPH-45 credit and MPH-65 credit), master of science (SM-42.5-credit, 60-credit, and 80-credit programs), master in health care management (MHCM), as well as the doctor of philosophy (PhD) offered under the aegis of Harvard Graduate School of Arts and Sciences.

The Harvard Chan School also offers several dual/ joint master's degrees:

- MD or DO/MPH • DMD or DDS/MPH • JD/MPH (with Harvard Law School only) • MSN/MPH (master of science in nursing, with Simmons College only) • MUP/MPH (master of urban planning with Harvard Graduate School of Design only)

Continuing Education: Harvard Extension School

General Information: For over 100 years, Harvard Extension School—recognized as a national and international leader in the field of continuing studies—has given the wider community access to many of the University's academic resources. Harvard Extension School offers numerous paths to personal enrichment and professional development. Our classes are open to students with various backgrounds and academic experience.

Our courses, certificates, and degree programs are designed to meet the needs of adult part-time learners, balancing academic rigor with flexibility and value. Whether you want to develop specialized skills, prepare for a new career, or simply pursue intellectual inquiry, we offer over 800 courses, more than 20 degree fields, and nearly 40 certificates to help you meet your goals.

Explore your options:

- Bachelor of Liberal Arts (ALB) degree: Start or finish your undergraduate degree with us. Choose from 20 fields of study and 26 minors.
- Master of Liberal Arts (ALM) degree: Earn a Master of Liberal Arts degree in one of 21 fields to gain critical insights and practical skills for success in your career or scholarly pursuits.
- Professional Graduate Certificates: Develop new skills and build expertise in a specialized area to update your professional profile, advance your career, or broaden your knowledge base. You can earn a professional graduate certificate online or on campus.
- Premedical Program: Prepare for medical or dental school and fulfill prerequisite coursework with top instructors, including Harvard Medical School faculty.

Harvard Summer School

General Information: Started in 1871, Harvard Summer School is the oldest academic summer session in the United States. Our more than 300 courses cover a wide range of topics, including the sciences, humanities, writing, computer science and over a dozen foreign languages. These open-enrollment courses are available to visiting students through on-campus and online options. In addition, students from Harvard University and around the world take part in more than 20 study abroad programs led by Harvard faculty. Finally, talented and motivated high school students can take

advantage of two selective programs. In the Secondary School Program, students earn college credit for courses and prepare for college, while students in the Pre-College Program participate in two-week noncredit courses and extracurricular activities with fellow students.

Harvard University Native American Program

General Information: Harvard University's founding Charter of 1650 pledges Harvard to "the education of English and Indian youth." With the designation of its vibrant Native American Program as one of the University's Interfaculty Initiatives, Harvard has rededicated itself to its founding pledge.

The Harvard University Native American Program brings together resources, faculty, and students from across the University in a shared commitment to teaching & research, community outreach and student recruitment & support - fulfilling its mission of advancing the well-being of indigenous peoples through self-determination, academic achievement, and community service.

For many years now, HUNAP has set about expanding its activities. Generous financial support from the University, committed individuals and an active Native community have enabled HUNAP to build the key institutional infrastructure that is needed to advance Native American issues, concerns and scholarship at one of the nation's top universities. HUNAP works directly with all of Harvard University's schools and programs and is here as a resource for current and prospective Native students, scholars and interested members of the community.
